

Timetable adjustments

Summary

Allow us to add our own events to our timetables to help us organise what work we are doing and when.

Details

It would be good if we could add appointments to our timetables. This would allow us to organise revision more effectively, leading to higher productivity.

Action List

Action Taken	Name and Role	Date
The Academic Affairs Officer has met with the Information Services (IS) Customer Service Manager, to discuss any potential technical barriers preventing timetable adjustments. It was confirmed at this time that the implementation would be dependent on how efficiently student records and outlook can be synchronised to display timetable changes, as it may be the case that adjustments would only be available from one or the other independently. IS have agreed to investigate these technicalities and report back to the Academic Affairs Officer.	N/A	N/A
